Edison Inventions

- 1. Research inventions created by Thomas Edison. Draw and describe three of them in the boxes labeled "Edison's Inventions".
- 2. Draw and describe what we presently have that is based on Edison's Inventions. Do this in the box labeled "Present Day Connection" for each invention.
- 3. Draw and describe what the future of this "Present Day Connection" will be. What will come next? This is the hardest part of the assignment. It is very difficult to imagine the unknown. Try for something that looks NOTHING like what we presently know. Do this in the box labeled "Future Vision" for each invention.

#1 Edison's Inventions	Present Day Connections	Future Vision		
Laison s inventions	Fresent Day Connections	Tuture vision		
#2				
Edison's Inventions	Present Day Connections	Future Vision		
#3				
Edison's Inventions	Present Day Connections	Future Vision
